Smart Health and Living

RmMS

RmMS(RANiX mPERS Management System) is a platform that provides emergency response system monitoring services including tracking, event, incident photo using WEB and mobile APP. This gives control for personalized configurations, activity tracking, location/call histories and incident scene photo. Ranix is committed to providing integrated solutions by combining mPERS devices and platform for the better life. During monitoring, mPERS devices communicate with RmMS server through HTTP and TCP protocols.
